INSTALLATION AND USE

BC submersible pumps are suitable for draining dirty and sewage water in domestic and civil applications. They come equipped with a DOUBLE-CHANNEL stainless steel impeller and are capable of pumping liquids containing short fibred suspended solids up to

They are ideal for pumping sewage, waste water, surface water and water mixed with mud in locations such as blocks of flats and detached houses.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

POS.	COMPONENT	CONSTRUCTION CHARACTERISTICS
1	PUMP BODY	Cast iron with an Epoxy Electro Coating treatment for a greater resistance to corrosion, with threaded port in compliance with ISO 228/1
2	BASE	Stainless steel AISI 304
3	IMPELLER	DOUBLE CHANNEL type AISI 304 micro-cast stainless steel. The DOUBLE CHANNEL impeller permits one to obtain an excellent performance and a high energy efficiency, developing a greater pressure and guaranteeing the pumping of solid bodies with a diameter of up to 50 mm. Undoubtedly the best solution for the drainage of waste water.
4	MOTOR CASING	Stainless steel AISI 304
5	MOTOR CASING PLATE	Stainless steel AISI 304 for BC 10/50 Cast iron with an Epoxy Electro Coating treatment for BC 15/50, BC 20/50

ELECTRIC MOTOR

Electric motors produced to a high quality standard, subjected to the most rigorous checks to ensure excellent insulation. The impregnation of the winding, achieved with high quality resins, is followed by treatment in an oven for up to eight hours, thus ensuring the long working life of the motor.

BCm: single-phase 230 V - 50 Hz

with thermal overload protector incorporated into the winding

BC: three-phase 400 V - 50 Hz

- Insulation: class F

- Protection: IP X8

POWER CABLE

Power cable encapsulated in epoxy resin both in the area of the grommets and at the point where the wires exit the sheath, resulting in an absolute insulation from moisture and water infiltration.

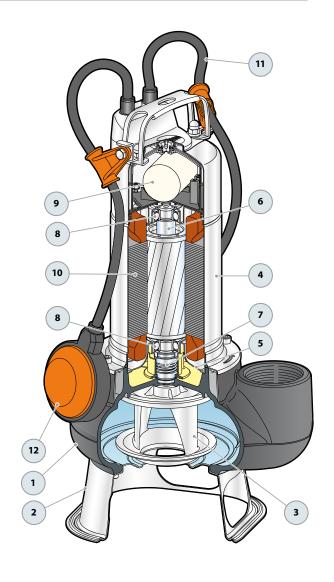

H07 RN-F" type (with Schuko plug for single-phase versions only)

Standard length:

- 5 metri for BC 10/50,
- 10 metri for BC 15/50, BC 20/50
